CES Energy Powering and heating hotel, apartments and student accommodation

Ardmore awards contract to CES Energy to design and build the energy centre to East Rd. The project consists of 3 blocks – student accommodation (for Quintain Developments), 661 rooms of studio apartments design and fabricated by Ardmore. This design consists of basement, plus 16 storey tower. The second block is for offices, and consists of a basement plus 9 floors (constructed for rocket investments). The third block is a hotel with the end user being Premier Travel Inn, incorporating 238 rooms designed as a basement plus 11 floors.

CES Energy's energy centre plant will include a lead fire CHP unit backed up by 4 no. gas fired boilers. The CHP and boilers will be parallel connected across flow and return headers in turn connected on a pumped primary two pipe heating circuit.
