## **CES Energy supplies heating and power to Islington**

CES Energy has secured the contract to provide a turnkey district heating solution to Ardmore for the Groveworld development at 259 City Rd, Islington, London. The 259 City Road project consists of 6,500 m<sup>2</sup> of residential space containing over 100 no. 1,2 and 3 bed apartments, each supplied with an individual indirect HIU to meet the domestic hot water and space heating requirements of the apartments.

CES Energy will design, supply, install and fully commission the district heating system from the plantroom to each individual HIU. The heating and power will be generated from a basement located plantroom containing CHP and gas fired boiler. CES Energy will also provide a billing system which will allow each apartment's usage to be easily remotely monitored for billing purposes.
